The Reproductive System Vocabulary

1. **reproductive system** - the organ system that enables humans and other animals to reproduce.
2. **sperm** - a male sex cell.
3. **egg** - a female sex cell.
4. **fertilization** - the process in which a sperm cell unites with an egg cell.
5. **testes** - the male reproductive organs that produce sperm.
6. **hormones** - a chemical made in one part of the body that affects the activities of cells in other parts of the body.
7. **ovary** - the female reproductive organ that produces eggs.
8. **fallopian tube** - the organ of the female reproductive system that transports eggs from an ovary to the uterus.
9. **uterus** - the organ of the female reproductive system that holds and nourishes a growing fetus.
10. **vagina** - the structure of the female reproductive system through which a baby exits the mother's body cavity during birth, also called the birth canal.
11. **zygote** - a new cell formed when an egg cell is fertilized.
12. **placenta** - a fluid-filled organ through which materials are exchanged between the mother and the developing offspring of humans and other mammals.

Female Reproductive System

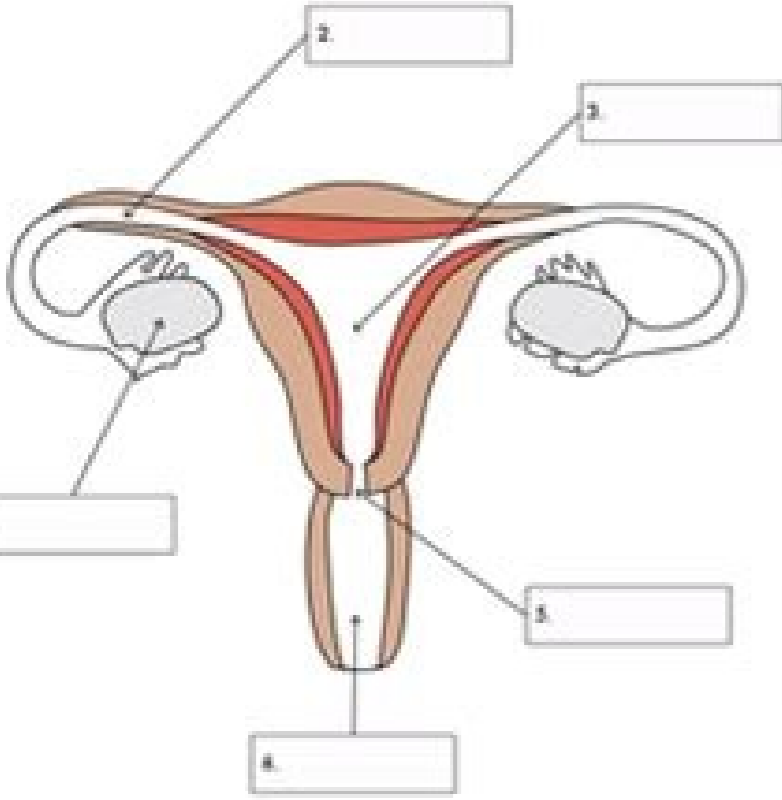

THE FEMALE REPRODUCTIVE SYSTEM

Label the parts of the female reproductive system in the diagram below. Use the table on the right to help you if needed.

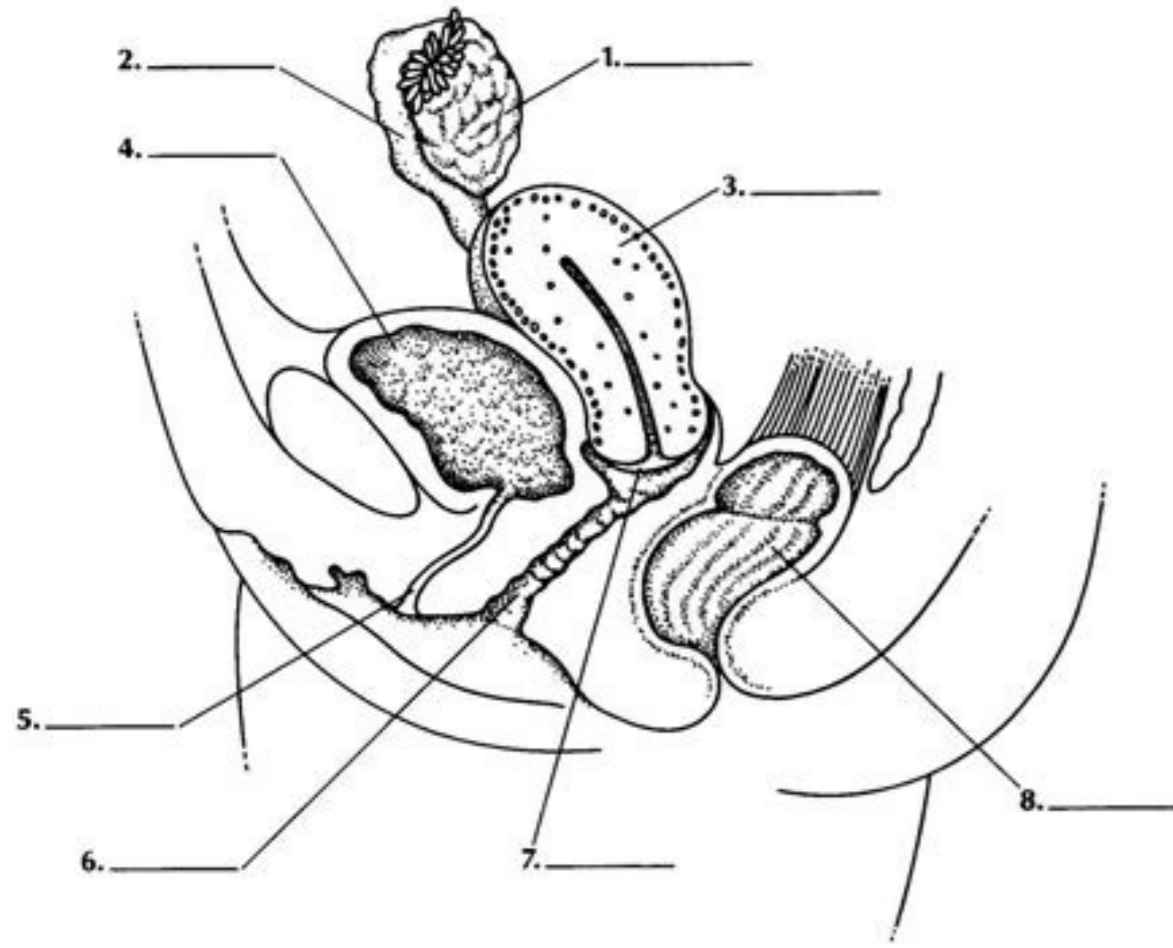

FUNCTION OF THE FEMALE REPRODUCTIVE SYSTEM PARTS

Complete the table below with how each part of the female reproductive system is involved in reproduction.

Female Reproductive System Part	How is it involved in Reproduction?
Ovary	
Oviduct	
Uterus	
Cervix	
Vagina	

Reproductive System of Human Female

Add the following labels to the reproductive system diagram of a male dog shown below. Vas Defresche, urethra, testicles, penis, sac scrotal, bladder, epididymic, penis bone, glans penis, prostate gland. Conducted through which the egg travels to reach the uterus. Corpus Luteum develops 6. RED D) The tail - proper sperm along the female trait. T / F 3. T / F 5. Description of the term uterus T / F 4 . Fill out the table using the choices in the list below. Brown B) Enzymatic sack that helps the penetration of egg sperm. In spaces under the diagrams, write some words that describe what is happening in the diagram above. 1) I chose different colors and color in: a) the cells that produce estrogen. 10 The underlying diagrams show different phases in the ovarian cycle. Cervix, E. The hormone changing the blank follicle in the Corpus Luteo. Collection of ducts in which the sperm are stored. Plant, I. II. Seminiferic tubules in which the sperm are made, T / F 2. Add the following labels to the diagram of the underlying female reproductive system. Egg attachment fertilized to the uterine lining if false write in the correct answer. Tubules where sperm are stored. Brown 5. Morula, G. Yellow C) The trusted part - contains mitochondria for energy for sperm movement. A cell of cells produced by the first fertilized egg division. The following diagram shows an ovary with stages of ovary development during an ovarian cycle. Estrogen secreted by follicle cells ... Blue 2. a) Arrange the following events in the ovarian cycle in the order in which they occur. 1. Placenta, J. Blastocyst, H. 2. Yellow 4. estrogen stimulates milk A e à, → À "LetÀ e à, →. Among the fetal and maternal blood systems. Penis, E. VAS or conduct of sperm. Please indicate whether the following statements are true or false. Follicle stimulating hormone E.
